DETAILED ACTION

Election/Restrictions

1. Claims 10-13 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 10-19-04.

2. Applicant's election with traverse of Group I in the reply filed on 10-19-04 is acknowledged. The traversal is on the ground(s) that the claims of the groups are related and would not require different search and consideration of prior art. It is noted that the traverse does not set forth specifically how the Groups are related. This is not found persuasive because the method as claimed does not require the specifics of the additional fibers or Syngyna Absorbency as claimed in the Group I claims and the product claims do not require the process as claimed in the method claims, i.e. search and consideration would be different.

The requirement is still deemed proper and is therefore made FINAL.

It is noted that the parenthetical of claim 10 should be --(withdrawn)-- to be accurate.

3. Restriction to one of the following inventions is now also required under 35 U.S.C. 121:

- I. Claims 1-2, drawn to a tampon, classified in class 604, subclass 374.
- II. Claims 3-9, drawn to a fibrous structure, classified in class 428, subclass 340.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different

functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are not disclosed as capable of use together because claim 1 and claim 3 require mutually exclusive densities, i.e. claims 1 and 3 are evidence claims.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification which would lead to diverging fields of search, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Mr. Joel Rothfus on 12-29-04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karin M. Reichle whose telephone number is (571) 272-4936. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Larry Schwartz can be reached on (571) 272-4390. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
